## 1 System requirement

- > Windows 10
- > ArcGIS Pro 2.5.0 or up
- > Microsoft Framework .Net 4.8

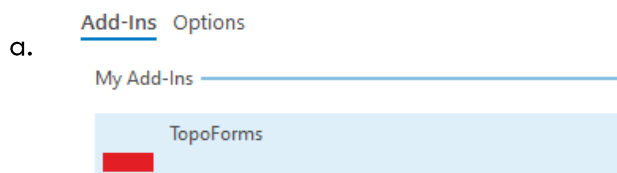

## 2 How to install TopoForms?

- 1) To use TopoForms you need to install ArcGIS Pro 2.5 or up.
- 2) To get TopoForms, go to ArcGIS Marketplace > ArcGIS Pro add-ins > TopoForms and click on

 button.

- 3) Launch TopoForms.esri.addinX.
- 4) You can check if TopoForms has been installed in ArcGIS Pro > Setting > Addin.

### Add-In Manager

- 5) Download the project template called "Demo\_TopoForms.aprx" on your machine by clicking on "Project" link.

1. Discover TopoForms !

Start a project discovering the capabilities of TopoForms downloading our trial version here :

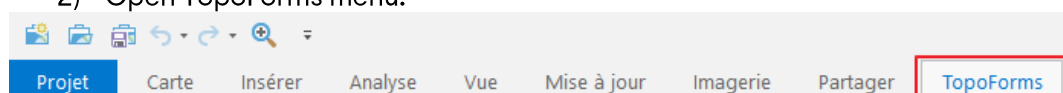

- 6) Open it with ArcGIS Pro.

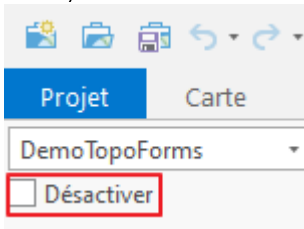

## 3 How to use TopoForms?

TopoForms works with data and gives you the ability to create, manage and share spatial and non-spatial data.

- 1) Open ArcGIS Pro template "Demo\_TopoForms.aprx".
- 2) Open TopoForms menu.

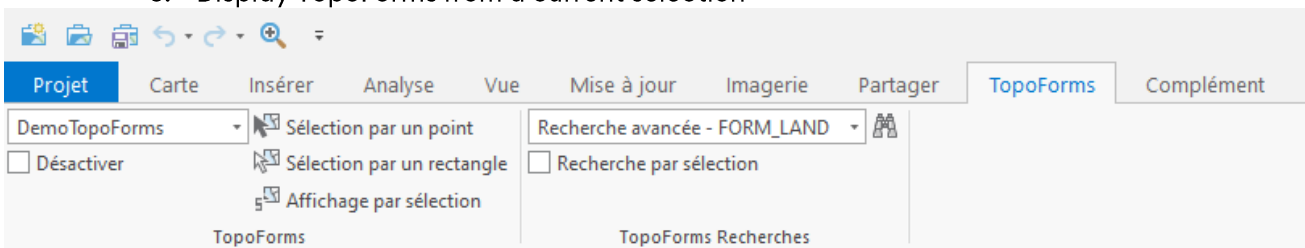

3) You can Activate or Desactivate TopoForms anytime.

4) You have 3 different ways to select an object on your map :

- a. Selecting by Point
- b. Selecting by Polygon
- c. Display TopoForms from a current selection

5) Select an object in the map > TopoForms window opens.
